IG Test User: Minor Sexualization/CEI Discoverability

As part of the Discoverability work in the Child Safety space, we created an Instagram test user to simulate the seeking behavior of a bad actor.

Our findings are documented on this deck: <https://fburl.com/2ybkl2gl>

TL;DR:

In less than 24 hours, we followed 70 accounts, which resulted in:

- Our Feed, Explore and Recommended Accounts sections being filled almost exclusively with Minor Sexualization content/accounts
- Receiving over 20 follow requests from such accounts (including ones we did not follow)
- CEI being recommended as the top result in the Explore section (it has been actioned and reported to NCMEC)

It is also worth noting that the Recommendations when searching for certain key terms are problematic.

Examples have been included on the deck.
